

Half Marathon -- Advanced Training Guide

Do you run half marathons regularly? Then this training program is for you!

Keep in mind everyone's life outside of running is different, so if Wednesday is not a good day for you then make it Thursday and take your day-off on Wednesday. If Sunday is not a good day for a long run do it Saturday. You get the idea!

The important thing is getting all of the week's mileage completed, not necessarily doing it on the exact day it's assigned.

Workout Descriptions

- Each highlighted day should include at least a 10 minute warm-up run and a cool-down run
- Everyday (unless labeled otherwise) is considered an easy run or 60-75% effort level
- Long Runs help build your overall endurance and cardiovascular system and should be at a 60-70% effort level
- Half Marathon Goal Pace Runs should help you lock in your race pace and help you get a feel for the needed effort level of 85-92%
- Pickups are designed to get you running much faster than race pace
- Up Hills are designed to get you used to running up hills at a faster than race pace
- Cross Training is any non-running activity that gets your heart rate above 60% of max for at least 30 minutes
Non-weight bearing activities are best. *ie: elliptical, stationary bike, rowing machine, spinning bike, etc.*
